First, the biggest question is who are the users. The prompt clearly state the two major users: mentors and mentees, and they are university students who want to engage more in their campus life.

How to register as a mentor? How to become a mentor? How to make sure this person is qualified as a mentor?

Qualification: enrolled students, GPA, hobbies, enrolled group, major?

What areas are in campus life?

Campus life is a broad topic.

What mentor needs?

What is the motivation of becoming a mentor?

Sharing an experience? Giving advice and help on the field to someone? Can mentor go to a mentee ask if they need help?

The ice-breaking point.

What mentor can do with this design?

What kind of mentees?

Local

International

Freshman

Change major/ new to the field

What experience do mentees need?

Academic advice

Study buddy

Social network

Finding course location

Language preparation / practice

What are the regulations?

How to ensure the data privacy of mentees and mentors?

School need to pass certain regulations to ensure the experience. Also, the reporting systems allows mentor and mentee to report issues (like assault?)

What interface am I creating on? Mobile? Website?

mobile device is the major platform
