Toggle Button allows student switch between "me" mode and "HR" mode. Currently is under "me" mode. The "HR" mode display simplified information of the student. This option is to help student users to understand how HR views them.

This badge areas shows the different solid skills that students earned from academic courses and self inputs.
The first row demonstrates the skills earned from courses taht approved by the workday database. On the second row, student users can add the skills they learned outside.

Acadminc (database in workday)

Self-taught/ learning from outside

Clicking on icon of "badge" will lead to "Badge Skills" will give you the result of specific courses you already took for built this type of skill. Scrolling down wil show button "course reconmendation", there are recommended courses to continue on building up this skills.

Taken Courses

Untaken courses

Tap on "skill build" will lead users to the pages that contains searching bar and lists of all the courses the school have. By typing keywords such as skills, couse names, professor names, the platform wil give students recommended courses.

After adding contents to the works, it will display in waterfall layout under the "work" sections.

"Add works" allows users to input featured picture, link, title and categorization of their personal works

On the "Works" session, student users can upload the information of their invidual works .

Tap on "Works"banner -> Shows the content.

Student users can tag their works with different keywords such as "class works"and "individual works". The app will display them with different color label.

On the profile page, if the alchemy platform detects the students had on-campus job experience in workday's database. These will display under "jobs" section.

Students also can input their outside campus jobs if they have any. The different lable colors shows whether it is a job experience that recorded on workday or it is a self-input/re-sume input experience.

Except the default categroies, students can also customize their lists of categories such as: adding any awards, honors, competitions etc by using the template that platform provides
